

Midcontinent

MIDCONTINENT (ABERDEEN) LIMITED

Since opening in Aberdeen in 1973 Midcontinent have excelled in sourcing and procuring products for use in Drilling, Production, Engineering and Energy related industries. We are registered with FPAL and have been BS-EN-ISO 9001 registered with BSI since 1992.

We are the longest established oilfield supply store in the UK, experienced in serving customers, onshore and offshore, worldwide providing a wide range of high quality products quickly and economically.

We work tirelessly to build strong and lasting relationships with customers and suppliers alike. Our weekly consolidated airfreights from Houston allow us to supply USA sourced goods within days rather than weeks with minimum cost impact for freight.

Our in house calibration lab offers fast, efficient and economical Repair, Refurbishment, Recalibration and Recertification of Oilfield and Industrial Instrumentation. Commonly required spares are held in stock to ensure we get the repaired goods to our customers as quickly as possible.

We continually review our product and service portfolio to ensure we continue to meet the demands of an ever changing marketplace. We are happy to quote customers on an ad-hoc as-required basis and we can also offer procurement agreements. These can be based on fixed prices, cost plus or a mixture of both to suit customers' individual requirements.

We welcome the opportunity to be of service to you and to discuss our products and services further.

RIG ESSENTIALS

We stock a comprehensive range of commonly used Rig Equipment in our 10,000sq ft purpose built Aberdeen warehouse. This includes but is not limited to the following:

GEARENCH / TITAN / PETOL	CHAIN TONGS, VICES, VALVE WHEEL WRENCHES
FORUM SPD	BAKERLOK, HYDRAULIC HAND PUMPS, PIPE VISES, GATE VALVES, PUMPS, FLOAT VALVES
LEWIS MANUFACTURING	SAFETY BELTS, TAIL ROPES, WIRE ROPE SNAKES
SOUTHWEST OILFILED PRODUCTS	FLUID ENDS, MUD PUMP EXPENDABLES, FLUID END COMPONENTS, WASHPIPES & PACKINGS,
I.A.D.C.	2-T-6 DRILLING REPORT PADS
STELLAR TECHNOLOGY INC.	ADVANCES PRESSURE, TEMPERATURE AND LOAD SENSORS
MARKALL	BALL PAINT MARKERS AND PAINT STICKS
PIPE WIPERS	DUAL SPLIT AND FLAT DRILL PIPE WIPERS
INSTRUMENTATION	HAND PUMPS, FLUID, CHECK VALVES, QUICK DIS-CONNECTS
LUFKIN INDUSTRIES	SPECIALISED RIG MEASURING TAPES
MORSE STARRET	MANUAL & HYDRAULIC CABLE CUTTERS
JET-LUBE & BESTOLIFE	SPECIALIST GREASES, COMPOUNDS AND LUBRICANTS
LUBTECH	ENVIRONMENTAL PROTECTION , SPILL CONTROL PRODUCTS AND ANCILLIARIES
McCOY	DIES & INSTERS

A stylized black and white line drawing of an offshore oil rig. The rig features a tall derrick, a crane, and various platform structures, all supported by several thick legs extending into the water. The water is represented by simple horizontal lines. The entire illustration is set against a light blue background.

PROCUREMENT SERVICES

Midcontinent offers procurement services to all sectors of the Oil and Gas Exploration and Production industry.

Since opening in the UK in Great Yarmouth in 1966, we have built strong relationships with major manufacturers and stockists of a comprehensive range of equipment both in the UK and world-wide. Our experienced staff procure the wide and diverse range of products and services required by our industry, economically and efficiently.

We offer contracts and agreements to suit our customers' individual requirements. We can hold stock in our Aberdeen warehouse tailored to your specifications helping to reduce lead times and helping you avoid costly downtime.

Local deliveries are handled by our own trucks daily at no charge and we can arrange delivery world-wide using approved freight agents.

Weekly consolidated airfreight shipments from the USA ensure non-stock goods sourced from North America can be delivered quickly and cost effectively.

Please contact Midcontinent (Aberdeen) Limited if you would like more information on any of our products and services.

INSTRUMENTATION SERVICES

Our service & recalibration division offers a fast and economical service for a wide range of commonly used Hydraulic Oilfield Instrumentation.

We offer daily collections and deliveries and we provide a clear and detailed estimate prior to your commitment, usually within 1-2 days of receipt. Instrumentation services offered include the following:

- ♦ Repair
- ♦ Refurbishment
- ♦ Recalibration
- ♦ Recertification
- ♦ Rental
- ♦ Sale of Spare Parts
- ♦ Sale of Instrumentation Consumables
- ♦ Sale of complete custom systems

Please contact Midcontinent (Aberdeen) Limited if you would like a quote or more information.

Southwest

Oilfield Products, Inc.

[Southwest Oilfield Products](#) is the unquestioned leader in the design and manufacture of premium mud pump components and expendables. Southwest products are known throughout the industry for their performance and durability. The innovative applications developed by Southwest produce greater performance on any brand of pump which, in turn, translates into greater profitability for the end user. All Southwest products are made in the USA. Products we hold in Aberdeen stock include:

- Fluid Ends
- HP Quick Change Valve Covers
- Fluid End Components
- Valves and Seats
- Pistons
- Liners
- High Quality Consumables
- Piston Rods and Clamps

Please contact us for more information.

Dropsafe is the global standard in the on / offshore Oil and Gas Sectors for securing and tethering overhead fixtures, providing an instant safety solution to dropped objects hazards. The largest Oil and Gas drilling contractors and more than 300 customers industry-wide currently use Dropsafe safety products at their facilities. Products stocked in Aberdeen include:

Dropsafe Nets

Safety Nets that enclose and tether overhead fixtures to prevent dropped objects

Dropsafe Pouches

Safety devices that are attached to the user, which securely enclose and tether handheld items used at height.

Dropsafe Accessories

Dropped object prevention accessories designed for use in harsh offshore environments such as padlock with securing cable, lanyards, securing cables, carabiners and safety shackles.

The largest Oil and Gas drilling contractors and more than 300 customers industry-wide currently use Dropsafe safety products at their facilities. Products stocked in Aberdeen include:

Dropsafe Nets

Safety Nets that enclose and tether overhead fixtures to prevent dropped objects

Dropsafe Pouches

Safety devices that are attached to the user, which securely enclose and tether handheld items used at height.

Dropsafe Accessories

Dropped object prevention accessories designed for use in harsh offshore environments such as padlock with securing cable, lanyards, securing cables, carabiners and safety shackles.

Introducing the **Dropsafe Barrier**

**Professional.
Reliable.
Secure.**

Dropsafe®
Drops Prevention Devices

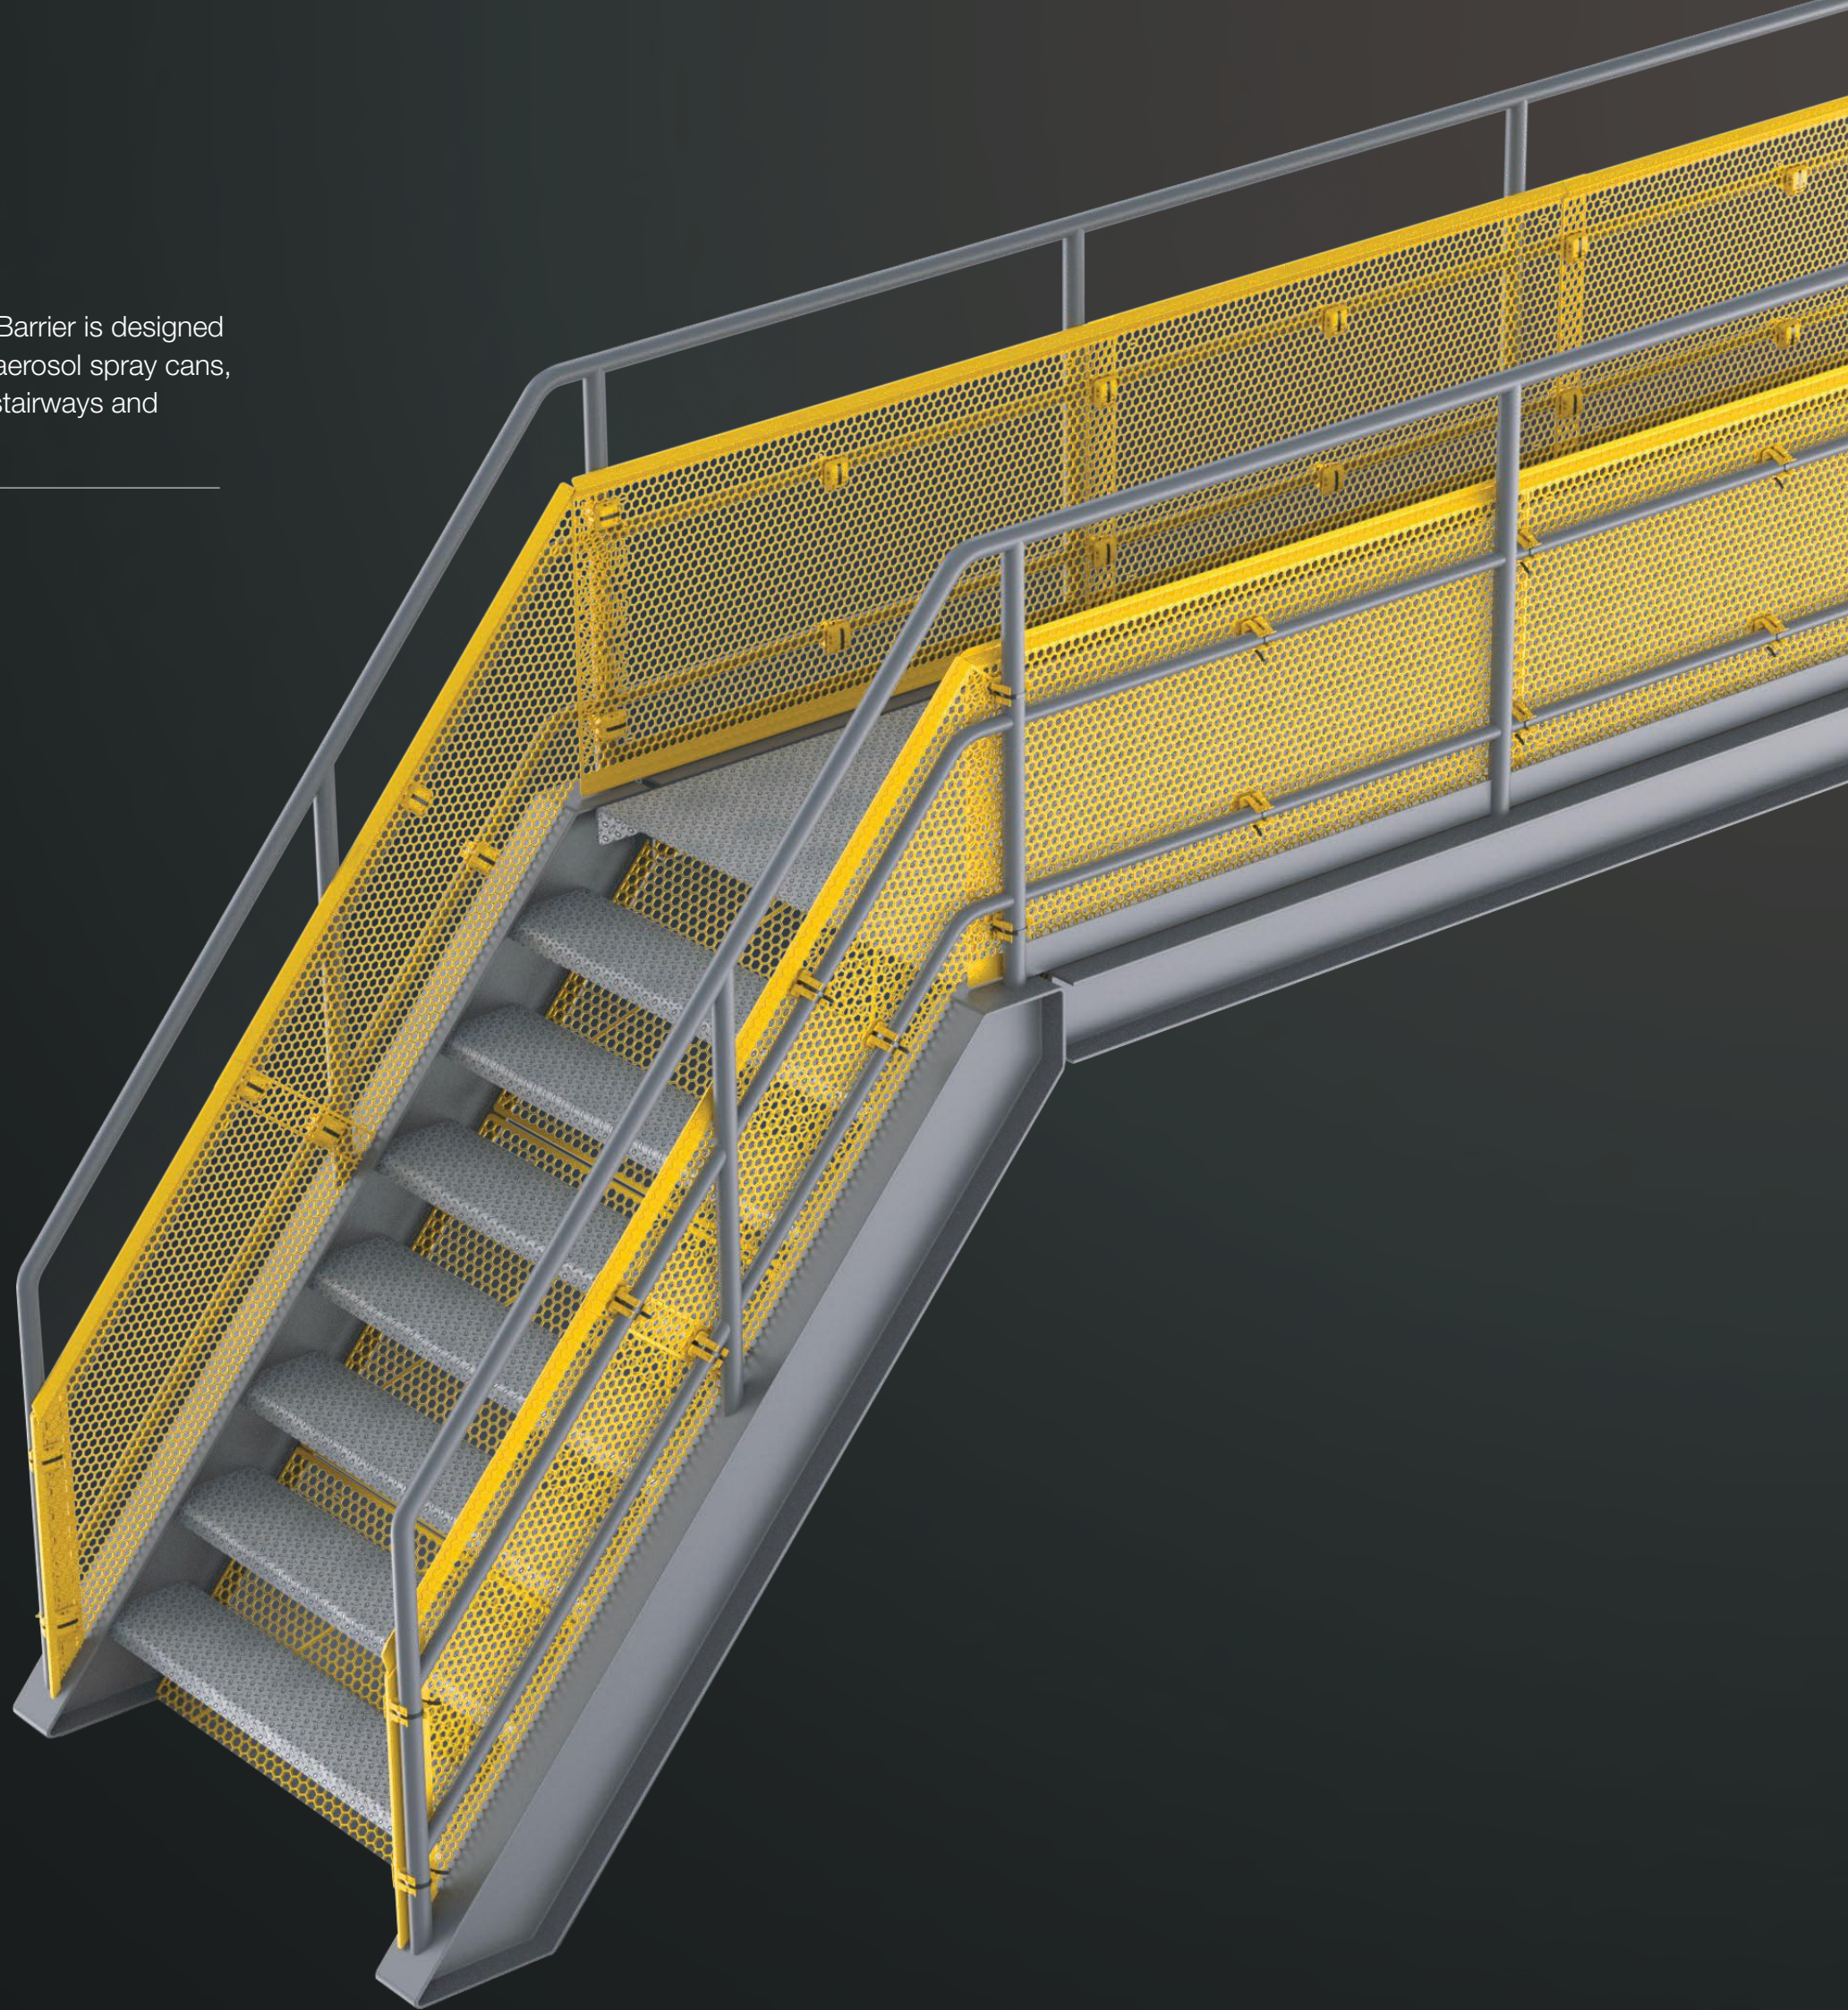

www.dropsafe.com

Dropsafe Barrier

A dropped object barrier system, for permanent and temporary use. The Barrier is designed to prevent items such as tools, water bottles, hard hats, two way radios, aerosol spray cans, shackles, maintenance equipment etc falling through open guard railing, stairways and elevated work platforms

Benefits

- Instant safety solution
- Fully tested & certified
- Compliant with relevant safety standards
- Closes the gap in human error
- Fast & easy installation with minimal tools

How the Barrier Works

The Dropsafe barrier panels attach along the inside of the guard railing of elevated walkways, stairways, access ways of permanent or temporary structures, utilising a universal attaching system. The impact resistance, coupled with the small honeycomb apertures of the barrier panels prevent loose items falling from height where the barrier is installed.

Where to use

The Dropsafe Barrier is designed for use in harsh on /offshore environmental conditions and is suitable for temporary and permanent use on:

- Catwalks
- Deck areas
- Gangways
- Monkey islands
- Monkey boards
- Stairways
- Elevated work platforms
- Portable safety railings
- Scaffolding structures
- Cherry picker / man rider baskets
- Machinery spaces
- Crane boom walkways

Features

High impact resistance

Designed for high winds

Smallest mesh aperture on the market
(19.8 mm 0.78 Inch)

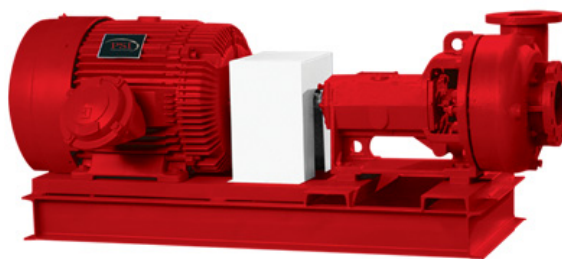

Designed for harsh offshore marine
environments

Midcontinent

PSI—PROCESS SOLUTIONS INTERNATIONAL

PSI specializes in equipment that transfers, mixes and conveys all types of products as each process requires. Product offerings include: MAX2000 Progressive Cavity pumps, Vacuum Degassers, Centrifugal pumps, Chemical Injection/Metering Pumps, Fuel Filtration Units, Brake Cooling Units, Mud Agitators, Mud Guns, Mixing Hoppers, Desanders, Desilters, Suction Strainers, Conveyors, gearboxes and custom fabrication. Process Solutions International supports all aspects of liquid and solids treatment processes ranging from environmental remediation, oilfield drilling operations and uranium mining throughout the world. Since 1991, the focus at PSI in providing quality equipment and service has been a number one priority company wide. They constantly improve their processes and advance the use of technology. In doing so, they are better positioned to help you become more efficient, productive—and profitable.

CUSTOM SAFETY PRODUCTS, INC.

Custom Safety Products, Inc. manufacture the original non-skid, positive traction pads for the different work areas on the rig floor. Since 1979, more than 3,000 drilling rigs and over 300 companies have used the design created by Custom Safety Products, Inc. This design includes the familiar stud and groove pattern, as well as the unique puzzle-cut method of locking rotary mat halves together. Winner of the 1991 Special Meritorious Award for Engineering Innovation, Custom Safety Products, Inc. continues to improve the Safety Pad, with new variations for different applications.

CSP's high density, urethane mats are custom moulded to fit any area on an oil rig, including-

- ♦ Rotary Table
- ♦ Driller's Console
- ♦ Monkeyboard
- ♦ Steps
- ♦ Pipe rack
- ♦ Entire Drill Floor

HAGGARD MUD DOG

Midcontinent are rental distributor for the HAGGARD MUD DOG ID WIPER.

The MUD DOG Wiper will do your dirty work for you while tripping drill pipe, keeping the mud in the well bore instead of on the rig floor and racking area.

Mud saved with the MUD DOG wiper is estimated to be 0.4 barrels per 1000' of pipe pulled from the well bore. Thixotropic properties of the mud and pipe size govern the amount of mud being saved.

Let the MUD DOG wiper maintain a clean, dry work area for the rig crew and enhance your safety programme.

SPECIFIC ADVANTAGES OF THE MUD DOG ID WIPER

1. Keeps mud in well bore
2. Clean up time converted to trip time reduction
3. Crew comfort equals morale-builder
4. Reduces or eliminates: ice plugs in tool joints, ice in pin-threads of tool joint, need for excessive pipe dope (because tool joints stay cleaner.

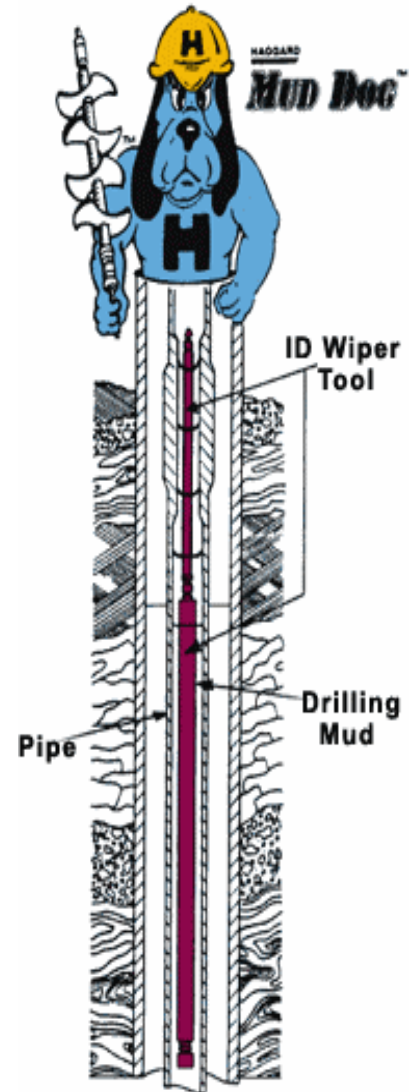

Please contact Midcontinent (Aberdeen) Limited for further information.

HOSES AND CONNECTIONS

Midcontinent offer a range of Hoses, Hose Connections and Crossovers for efficient and economical fluid transfer solutions:

ROTARY / CHOKE & KILL HOSES

Recommended for flexible connection between standpipe and swivel for pumping mud at extra high pressure in drilling and exploration work. We offer a wide range of length, size, pressure and connection options.

TODD HOSE & TANK CONNECTORS

Used extensively for offshore ship to rig transfers of fuels and drinking water, aviation fuel bunkering, loading / discharge, chemicals etc. Todd connectors are fully interchangeable with Avery Hardoll.

HAMMER UNIONS

We offer a complete range of Hammer Unions for various applications and pressure ratings. These are available in standard and sour service in Butt Weld and Threaded options complete with full certification.

BUTTERFLY VALVES

Midcontinent can offer a wide range of butterfly valve configurations and sizes from manufacturers including FMC and Demco. We also hold standard spare parts in stock in Aberdeen.

CROSSOVERS

Crossovers can be supplied in various configurations.

MAKE OR BREAK PRODUCTS

The Make or Break product has been developed to reduce the risk of injury when changing out worn or damaged bulk hoses.

THE COMPLETE SUPPLY STORE

Rig Solutions

Dulon's corporate values embrace an innovative attitude and a problem solving mentality. One of the innovations is a highly concentrated product -Dulon F10 C-ES- in combination with a mixing unit 360C. This device dilutes an IBC (1.000L) of concentrate with water, resulting in a year supply of 12.000 liters of ready to use **Dulon Eco safe Rig wash**. The combination of mixing unit with one IBC of concentrate, practically rules out transportation costs and packaging, especially when operating in remote areas .

Dulon F10 C-ES

- Water based concentrate of Dulon Eco safe Rig wash, to be used in combination with mixing unit
- CEFAS registration: 25071 - gold ranked, NL HMCS category R
- Item no.: 2-1415 (1000 ltr)

Dulon 360C mixing unit

- No electricity or air pressure needed
- Operating on tap-water pressure only
- Free of charge (on loan)
- Easy to install and work with

HIGH PERFORMANCE CLEANERS

MORSE STARRETT

We are agents and stockists of Morse Starrett Wire Rope Cutters, Spares and associated products, please contact Midcontinent for more information.

IMPACT CUTTERS

The original portable tools invented in 1928 by Morse-Starrett to cut wire rope. Actuated by striking with a hammer, they are easy to operate and give superior performance without jamming. They are precision-engineered to deliver a clean cut without affecting the original roundness of the wire rope. The blades and dies are made of the finest tool steel available, heat-treated, and ground to close tolerances.

MANUAL CUTTERS

These self-contained hydraulic cutters are precision engineered tools designed to give a clean cut with minimum effort. Just pump the handle, no outside power is required. Able to be easily carried, these models are favourites of contractors, rigging lofts and elevator repairmen, and are recommended by wire rope manufacturers worldwide. All three models will operate under water with special factory modifications. Suitable for wire sizes up to 1-3/4".

POWER OPERATED

These models can be activated by any electric, gasoline, hand, battery or air operated hydraulic pump capable of developing 10,000 p.s.i. and having free flow return through the pressure line. The pumps are then hose-connected to the Hydrashear body.

RE-BAR, CHAIN, STRAND AND BOLT CUTTERS

Convenient to use at any angle and weighing less than 12 lbs, the Model S can be activated by any electric, gasoline, hand, battery or air operated hydraulic pump capable of developing 10,000 PSI and having a free flow return through the pressure line. The front blade can be adjusted to proper cutting clearance after sharpening, and the back blade is fixed.

PLUG VALVE BACK SAVER

Midcontinent are agents for BACK SAVER, the new tool for easy and safe transportation, installation and handling of Plug Valves.

Main Product features are as follows:

- Designed for easy mounting on Plug Valves, the Back Saver can be left on while in use and fits Anson, FMC and SPM Valves amongst other makes.
- Facilitates opening and closing of valves. If the valve is stuck, a leverage bar can be inserted diagonally between the handles to help open and close the plug valve.
- When turned to closed position, the valve can easily and safely be transported.
- Greasy and slippery Plug Valves can weigh more than 40 KG and using the Plug Valve Back Saver ensures no individual lifts more than 25 KG.
- Compliant with EN-13463-1 Non electrical equipment for potentially explosive atmospheres.
- Made from Sea Water Resistant Aluminium

SPILL CONTROL

We handle an extensive range of spill control products which includes absorbents, spill kits, drain protection and drum storage products.

ABSORBENTS

Absorbents are available in three grades:

—Maintenance, oil or chemical. Maintenance are recommended for everyday fluids and cope with oils, fuels, solvents, cutting fluids, milk acids and alkalis, water and even foodstuffs such as milk and wine.

-Oil Only. Used to separate oil (or fuels) from water. They readily absorb all oils and fuels but don't touch the water.

-Chemical. These will absorb virtually everything.

Absorbents are available in various styles including Pads, Rolls, Socks and Pillows.

SPILL KITS

If there's a need to keep a collection of absorbents in one location, go for a spill kit. There's a spill kit for any size of spill from 10 – 900 litres. Spill kits are packed in a variety of bright yellow containers for easy identification.

DRAIN PROTECTION

An integral part of spill control. Use in an emergency to supplement absorbents and spill kits. These include Drain Covers, Clay Drain Mats, Drum Plugs, Polyurethane Drain Covers and Spill Barrier.

BIO-REMEDIATION

These products function by eating oils and fuels and are available for various applications.

DRUM STORAGE

Essential to spill control, drum storage products comply with the Oil Storage Regulations and products are available for Steel and Polyethylene Drum and IBC storage. Included are spill trays, work floors, spill decks, spill pallets and bunded flooring.

DISPENSING SYSTEMS AND ANCILLARIES

A comprehensive range of dispensing systems and ancillaries are available which should cover all of your needs.

Midcontinent

Company Overview

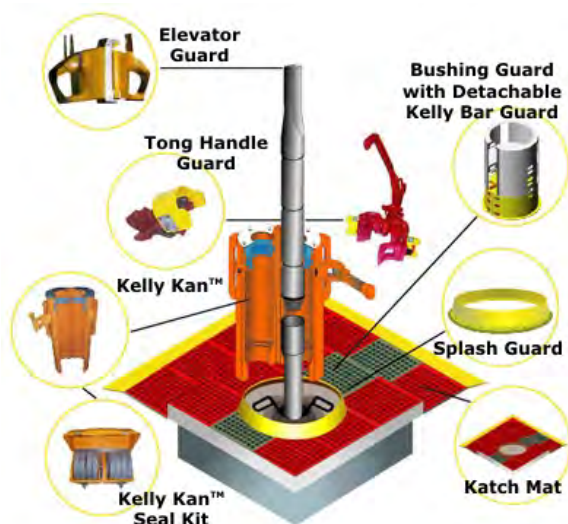

In response to industry challenges, Katch Kan™ emerged in 1994 with the objective of optimizing rig performance, personnel safety, and sustainable development within the upstream oil and gas industry. With these goals in mind, the company engineered both the Rig Safety System™ and Zero Spill System™.

Today, these two systems responsibly reduce strain, sprain, and crush injuries, occurring to personnel on the work-floor (especially those new to the industry), while also providing oil companies and contractors with a means to minimize or eliminate on-site fluid contamination.

Katch Kan™ is an ISO 9001, 14001, and COR certified company, driven to provide quality standardized results through its practices; now operating in over 52 countries worldwide.

No other company in the world functions under the same model, nor provides rig safety and zero spill technology as effectively. Shortly put, Katch Kan™ arms oil companies and their associated contractors with performance, safety, and environmental advantages.

McCOY

We are delighted to be stockist and distributors for McCoy (Precision Die Technologies). Since 2005, McCoy has been producing GRITFACE® Dies and Inserts; today they manufacture all the common dies and inserts used throughout the world. McCoy inserts are machined, not cast, to provide the accuracy you need for critical applications. Their dies are heat-treated to provide maximum insert life. They also offer a variety of tooth patterns to securely grip the hardest strings of casing, tubing, and drill pipe.

McCoy know that today's hostile well environments often use corrosion-resistant alloy (CRA) tubulars that require special handling tools. Their GRITFACE® Inserts allow you to use your standard handling tools with CRA strings because the GRITFACE® Coating prevents contamination and marking. It's economical and allows you to use the tools you have on hand.

We know that you can't always wait when you need tongs or handling tool inserts. We maintain a large inventory that allows us to respond to your needs 24 hours a day, seven days a week, every day of the year. And if you need custom dies and inserts for unique applications, McCoy's engineering and manufacturing teams are ready to work with you no matter how great the challenge.

Product Line at a Glance

Ball Bearing Swivels (Y-Link)

54 standard types cover virtually every combination of shank and cap styles. Working loads from ½ to 1000 tons. All equipped with precision ground angular contact ball bearings for low torque under load, maximum reliability, efficiency, and long service life. Best in class.

See pages 11 - 18

Miller Mobile Crane Blocks

feature drop-away sheave guards for reeving with the rope end fitting in place, DIN 15400 single or duplex hooks with locking latches, and permanently-lubricated double-row full complement cylindrical roller bearings in the sheaves. Standard sizes to 80 tons with up to 7 sheaves with larger designs available.

See pages 53 - 59

Thrust Bearing Swivels (Econo-Link)

Our economy priced models are designed to minimize costs without sacrificing traditional Miller quality. Fitted with factory lubricated tapered roller thrust bearings and forged steel hooks. For rope sizes ½" to 1" and working loads to 15 tons.

See pages 19 - 20

Overhead Crane Blocks

Miller overhead crane blocks are produced to suit your application and are available to 300 tons WLL and for all CMAA service classes or to other requirements. Single and duplex hooks, locking hooks, insulated and motorized models available.

See pages 63 - 64

Special Swivels

Many special adaptations are available for special environments and applications. These include water tightness, high pressure and pressure compensating and stainless steel models for marine or corrosive industrial environments, undersea construction, tailored end fitting combinations, heavy wall for demolition, line-stringing, extra overhaul weight, etc. HD-Link, G-Link, Hydro-Link...

See pages 21 - 34

Overhaul Balls/Split Balls

Featuring Miller angular contact bearing swivels, our overhaul balls help prevent wire rope twist and lengthen rope life. A wide variety of split balls and headache ball assemblies are available with eye, wedge, and clevis connection fittings. Standard overhaul weights to 1350 lbs. with larger models to suit.

See pages 35- 40

Forged Hooks

Miller stocks a line of hooks certified to the DIN hook standards 15401 and 15402 for single and double hooks. The DIN standards are intricately detailed standards of German origin and DIN hooks are used worldwide by the very best names in the lifting equipment industry. Hooks are available in the raw forged

state or machined with matching nut to safely and reliably suit your application. Duplex, quad and custom-forged types are available. Also Eye Hooks to 400 tons WLL including ROV-ready.

See pages 65 - 70

Economy Weight Balls

Low cost swivels use Miller Econo-Link factory lubricated thrust bearing swivels and have overhaul weights to 575 lbs. For working loads of 3 to 15 tons, ½" to 1" wire rope. Extremely compact design maximizes lift range. Well suited for mobile applications.

See page 41

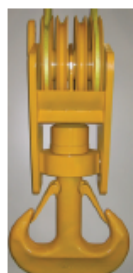

Insulating Links - (ISO/Link) For Power Line Safety, and More

Insulating links on Miller Swivels and Miller Blocks, or our non-swiveling insulating link alone, fitted to your specific situation can help protect against injury or death caused by crane boom or wire line contact with overhead power lines. Miller pioneered this technology over 50 years ago with generations of design improvement. Miller's ISO/Link-AC provides for outdoor crane electrical safety with working loads to 60 tons. Our ISO/Link-DC with load ratings to 60 tons is made for industrial applications where isolation of high currents from the building grid, as in induction heating or industrial welding, is necessary.

See pages 74 - 81

Hi-Lift Blocks and Sheaves

Miller Hi-Lift Crane Blocks' welded, super-rigid construction makes for the most rugged and dimensionally stable block available, providing for a long and reliable service life. Miller blocks come standard with DIN 15400 hooks. The integrated sheave guard guides the rope for easier threading and eliminates the possibility of the rope jumping the sheaves. Sheaves for our Hi-Lift Blocks are cast or roll forged and are equipped with

cylindrical or tapered roller bearings, or bronze bushings by request.
